Description

**FAAC Parkplus System**

- PARKPLUS is the advanced FAAC system for the professional management of modern-concept parking areas. The system provides simplicity for users and installers whilst maintaining reliability and precision required by managers.
- Innovative and modern concept designed to provide a terminal that is ergonomic and easy to operate by the user. The backlit display provides users with useful and easily understandable information. Structured for inexpensive use and low running costs - the system is based on simple yet advanced mechanics and highly reliable electronic components.
- The ease of removal for cleaning or replacing parts - calibration operations or maintenance - does not require specific technical know-how. Optimal use even by non-specialised operators. Fit to withstand high traffic levels.
