Description

**Magnetic stirrer heating AMR 1T**

- Is a tool to consolidate our success is widely used in laboratories for research and development, industry and universities around the world.
- Equipped with electronic speed control, AMR 1T represents the solution "universal" for the most common laboratory needs thanks to its characteristics of reliability, durability and security.
- The selective choice of materials is another key to the success of this solution: hot plate constructed of stainless steel that ensures a uniform heat distribution across the surface and excellent resistance to chemical reagents.
