Description

T Digital AVL03

- This is a device that uses the Global Positioning System to determine the precise location of a vehicle, moving house, trailer or other asset which AVL is installed on and to record the position of the AVL at regular intervals.
- WithSirf Star III GPS systems, it records not only position, but also velocity, Date time, direction, status of digital output ports, etc.
- The main purpose of using AVL is not only to locate the vehicles, but also toobtain information about the status of doors, windows and ignition, etc. Or remotely monitor cutting off gas and power supply, etc. Sometimes, if users want to upgrade the AVL version, then we will give users new software firmware to update it. In this situation, please contact our service center.
