Description

FAAC 391 24V (MPN 104577) swing gate operator.

- The 391 is a 24V articulated arm operator for single-gate leaf lengths up to 2m (2.5m with electric lock).
- Easy to install compared to linear types and has an easy set up procedure.
- A practical and economic choice for automating gates on narrow pillars.
- Good aesthetic design and compact with built-in control board.
- Anti-crushing protection ensured by an electronic device installed on the control board.
- Cuts down maintenance requirements considerably.
