Description

FAAC 402 SBS 230V (MPN 104474) swing gate operator.

- The FAAC 402 system is a practical and economic choice for residential swing gates with single leaf length of up to 1.8m (402 CBC/SB) or 3m (402 SBS).
- The hydraulic operator requires little maintenance and is low on electrical power consumption.
- The exclusive hydraulic device ensures maximum anti-crushing protection.
- In case of an emergency - the release key makes it possible to operate the gate manually.
- Few components and the use of hydraulic oil as motor fluid are the secrets to ensuring very quiet movement.
- Reliability under all atmospheric conditions and in an outdoor temperature range of -40oC to +55oC.
- Thanks to its compact size the FAAC 402 can be installed even when space is at a premium.
- Corrosion proof coating - highly resistant to atmospheric agents - provides a long product life.
