Description

**FAAC 422 SBS (MPN 104210) Hydraulic gate Operator**

- Hydraulic operator, for residential and condominium swing-leaf gates with single-leaf max length of 3m
- For residential and commercial swing gates up to 3m
- The exclusive hydraulic device, ensuring maximum anti-crushing protection, features two highly sensitive by-pass valves.
- In case of an emergency, the customised release key and a special ergonomic release make it possible to operate the gate manually.
- Few components and the use of hydraulic oil as motor fluid are the secrets to ensure quiet movement and reliability
- There is also corrosion proof coating which is highly resistant to atmospheric agents providing long life.
