Description

FAAC 740 230V (MPN 1097805) Sliding gate operator with Control Board FAAC 740D

- The 740 operators are ideal for residential sliding gates with max weight of 500kg.
- A gearmotor with built in electronic equipment and securing plate automates both new and existing sliding gates.
- The electronic equipment inside the gearmotor facilitates and speeds up installation at a lower cost.
- The control board enclosure has a "rotation" facility which helps with electrical wiring.
- Anti-crushing protection is ensured by a control board directly controlling drive torque.
- For extra safety an efficient obstacle detector is available.
- The control board is simply programmed via 3 push buttons making set up at installation an easy process.
- An internal protection housing covers the control board preventing damage from insects and moisture.
- As the gearmotor is non reversing - no electric locks need be installed.
