Description

FAAC Maxi Revolving Doors

- Revolving doors are ideal for maintaining a steady temperature - respecting the environment through low energy usage and providing an aesthetic entrance to any building.
- FAAC offer a range of revolving door types and designs to suit every application - environment and customer requirement.

- Maxi revolving doors are ideal for entrances of buildings where people traffic is dense.
- They can have triangular or rectangular displays in the centre which may be used for product display and advertising purposes. Non-display options are also available.
- Rubber buffers and brush strip fitted to prevent fingers being trapped.
- Up to 6 spotlights can be flush mounted in the ceiling panels.
- Laminated glass used throughout - can be coloured - tinted or mirrored.
