Description

FAAC TK20 (MPN 105563)

- FAAC TK20 door profile.
- TK20 profile for automatic sliding doors with reduced section of 20mm.
- Slender - light and easy to use while respecting legal standards.
- Add a refined and innovative design to an automatic sliding entrance.
- Aluminium alloy profiles with reduced section thickness of 20 mm and width of 25mm - complete with gaskets to house glass panels of a thickness of 8 mm or 10 mm with PVB foil 0.76.
- The central uprights of the fixed leaf are 30 mm wide and have a double groove to house the photocell.
- The lower base is 80 mm high and a seat inside it houses a special plastic profile which provides brush support between leaf and floor for thermal insulation and a sliding guide for the stainless steel sliding block.
